Des Moines TCE Superfund Reuse Report (30047239).pdf

One more document – I found the 2007 Reuse Assessment report in pdf format.

Thanks very much, Mary. DNR has plans to attend. We are looking forward to the meeting as well. We will have a pre-meeting with the Des Moines School District and Police Department tomorrow in effort to try to have some scenarios identified that we could send to your team in advance of the meeting Friday. The relationship between the school and the PD is new, and there is a lot of learning going on, but it's an environment of possibility and ability to seek consensus. The technical advisement will be very helpful, and I think it will just be great to have everyone in the room that is seeking to provide information and further discussion. See you then!

**Subject:** technical documents on Dico

Rita,

Attached are two documents that may be helpful to our discussion on Friday, and may be helpful to your consultants. The first document is the 1996 Record of Decision that summarizes environmental conditions and contamination in the site soils, buildings, and the south pond area. The second attachment contains excerpts from a recent groundwater report submitted by Dico's consultant. This attachment contains figures that depict groundwater flow patterns and contaminant levels that remain in the groundwater at the site.

I will also bring the March 2007 Reuse Assessment that EPA prepared for the Dico property; it has some figures that depict areas of site soil contamination.

I am not sure whether IDNR plans to attend the meeting on Friday. I look forward to seeing you Friday morning.
